

Nighttime noise wall panel installation begins week of March 10

Starting as early as the week of March 10, crews will begin installing noise wall panels near your home. The majority of this work will be done at night (8 p.m. to 6 a.m.) and will take approximately five weeks to complete.

How will crews install the noise wall?

The noise wall consists of 141 panels. To install the wall panels crews will:

- Use a crane to unload panels from trucks.
- Position each panel above the wall foundation.
- Secure the panels in place.

What should I expect during panel installation?

To keep traffic moving during the day and ensure the safety and efficiency of our crews, the majority of this work will occur at night. During panel installation, nearby neighbors can expect to see and hear the following:

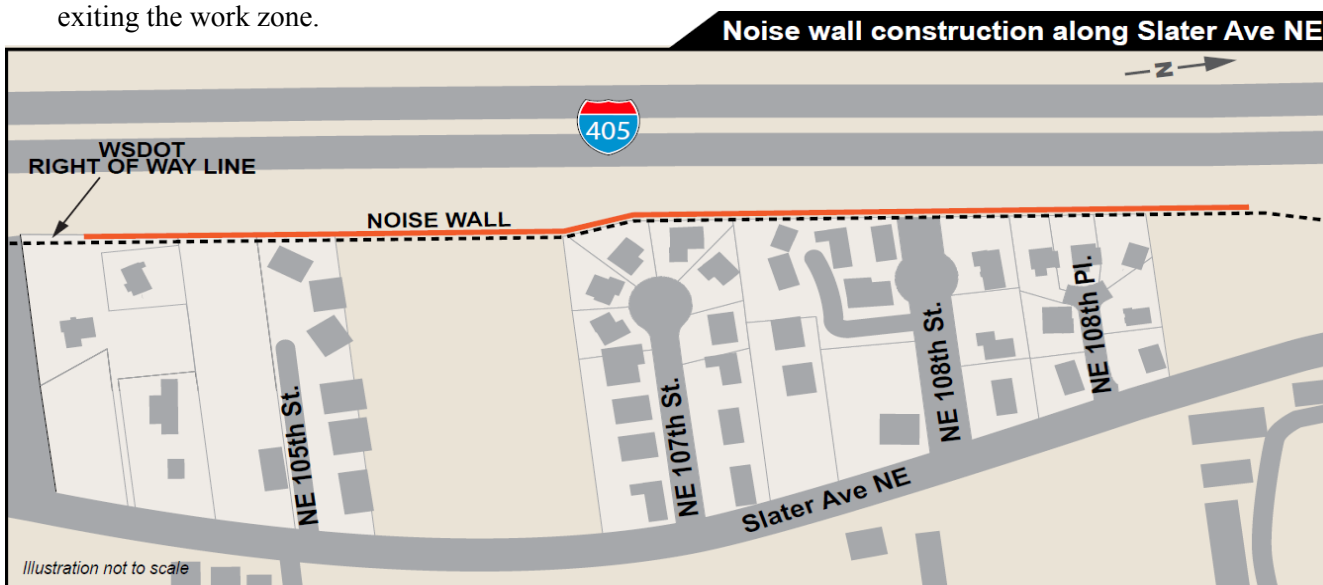

- Trucks and cranes used to deliver the wall panels.
- Construction lights and backup alarms on mobile equipment required for safety.
- Construction crews and equipment entering and exiting the work zone.

What happens after the panels are installed?

The full benefits of the noise wall will not be noticeable until crews complete the finishing touches, including:

- Sealing the gaps between and at the bottom of each panel.
- Installing concrete wall caps.
- Spraying a tinted sealant on the walls to protect them from water damage.

*Thank you for your patience during construction.
This work will help reduce noise from
I-405 in your neighborhood.*
